

Instalação do PHP no Windows

quinta-feira, 9 de fevereiro de 2023

Baixar o PHP a partir do site oficial

<https://www.php.net/downloads.php>

The screenshot shows the 'Downloads' section of the official PHP website. The page has a dark blue header with the PHP logo and navigation links: Downloads, Documentation, Get Involved, and Help. Below the header, the 'Current Stable PHP 8.2.2 (Changelog)' section is visible. It lists three download options for PHP 8.2.2: a tar.gz file (19,605Kb), a tar.bz2 file (15,257Kb), and a tar.xz file (11,657Kb). Each file has its SHA256 hash and the date '02 Feb 2023'. There is also a link for 'Windows downloads' and 'GPG Keys for PHP 8.2'.

[GPG Keys for PHP 8.2](#)

Selecione a opção “Windows downloads”

VS16 x64 Non Thread Safe (2023-Jan-31 22:06:06)

The screenshot shows the 'Windows downloads' page for PHP 8.2.2. The page is divided into two main sections. The left section contains information about building PHP binaries, PECL extensions for Windows, and which version to choose (IIS or Apache). The right section lists the available download packages for PHP 8.2.2. The 'VS16 x64 Non Thread Safe (2023-Jan-31 22:06:06)' section is highlighted, and the 'Zip' option (30.21MB) is selected with a red box. The 'VS16 x64 Thread Safe (2023-Jan-31 21:56:02)' section is also visible below it.

If you like to build your own PHP binaries, instructions can be found on the [Wiki](#).

PECL For Windows
[PECL extensions](#) for Windows is being worked on. Windows DLL can be downloaded right from the [PECL website](#).

The PECL extension [release](#) and [snapshot](#) build directories are browsable directly.

Which version do I choose?

IIS
If you are using PHP as FastCGI with IIS you should use the Non-Thread Safe (NTS) versions of PHP.

Apache
Please use the Apache builds provided by [Apache Lounge](#). They provide VC15 and VS16 builds of Apache for x86 and x64. We use their binaries to build the
